

Synopsis and Guiding Questions

Partnership and Networking

To achieve the outcomes of a Montfortian education, we cannot depend on internal school efforts alone. In an increasingly divergent society, there are many opportunities out there for us to harness. Doing so will also allow our students to learn more about team work and collaboration.

During this session, participants will learn about the different partnership and networking platforms schools in our seven schools. Through a rich sharing session, participants will know how each school has leveraged on the resources and organizations outside school for the benefits of students. Participants will also gain many possible networks and contacts in which they can take back to start their own partnership initiative. At the end of the sessions, it is hope that our seven schools can start some form of collaborative efforts in promoting partnership and networking.

Some of the guiding questions are:

1. What are your current partnership and networking initiatives/practices?
2. What are some of the impacts of these initiatives/practices?
3. What could make your partnership and networking stronger and more effective?
4. Which areas do you hope to find more partners and networks?
